

## **Minutes for meeting on 20/02/13**

Absent – Bartek

-Basically, things are not going great currently.

### **Vision**

-Orientation still not working properly, keeps saying every angle is 236 degrees and gets confused in corners. Sean says the overall method is good but the input is a little warped – this could be a threshold problem.

-Sean and Michael are working on control GUI.

### **Simulator**

-Finding it hard to separate control functions from the simulator.

-Andrei and Cristina will be working on the simulator today and should hopefully have it functioning by tomorrow morning.

### **Communications**

-Finn is having a little trouble getting the project code to run on his DICE account. Could become an issue.

### **Strategy**

- Sean has started the code for planning n actions ahead.
