

Minutes for Meeting 18/02/13

Absent – Cristina, Mario

Mario – where are you??

- A very short meeting today just to check in with what everyone is doing and that they are on schedule.

Vision

- Orientation still needs to be fixed but Sean knows what to do.
- I need to start generating the test data.

Simulator

- Andrei says that the basic simulator should hopefully be done by the end of the day.

Communications

- Finn needs to finish his testing on the bluetooth cacheing and then this should also be done by the end of the day hopefully.

Robot

- Our robot will be made sturdier and stronger with a frame etc. probably tomorrow (19/02/13).
- Touch sensors will also be added and Finn has written most of the code for these already.
- Possibly adding some speakers to the robot so it makes cool noise.

Strategy

- Bartek will be working on the decision maker for Wednesday.
- Sean will also start working on the A* search algorithm.
- Mario was assigned the task of writing some more percepts but not sure if he is okay with this assignation.
